

Innovative DeFi on Binance Smart Chain
Upto 10% daily return and 13% referral bonus
Fully Verified and Audited Contract

WhitePaper

v1.0

What is the price of Vegetable?

Vegetable do not have a set price. Higher TVL more Vegetable per BNB, Lower TVL less Vegetable. This creates level playing field so no user can be late. There is NO calculator available to work this out.

What will my daily percentage be?

Daily percentage is up to 10%. This depends on farming cycle, the time of day you re-growing or deposit and TVL fluctuation. Average daily return is 7-10%.

Why are my rewards not growing?

Farming cycle effect rewards, you harvest too much your daily percentage Vegetable.

If you only started with a small deposit it will take time to display on the dApp.

Only goes to 3 decimal places. TVL daily increase can cause lower daily percentage.

What happens if i always harvest?

If you always harvest, your daily percentage will drop dramatically and will not receive the highest daily returns. This is the anti-whale mechanism that preventing a whale draining the TVL.

Is re-growing more often better, 2 or 3 times a day?

Re-growing is the same as compounding. You will need to pay standard BSC gas fees for every re-growing.

What are 'Vegetable'?

Vegetable are the miners that are hired with BNB and work to get your rewards. This is just a term we decided to use. Crypto OGs will know 'Vegetable' as BNB.

Can I get my initial back?

BNB Farm is a locked rewards pool, so no. You get your initial back over time through the my rewards section of the dApp.

How come my referrals aren't showing | Where are they?

Your referrals show up in the 'My Rewards' Section of the miner dApp. Referrals are 13% of the deposit. 1 BNB deposit means 0.13 BNB reward.

What are the fees?

There is 3% dev fee taken upon ALL deposits and withdraw from BNB Farm.

Standard BSC network gas fees are required for EVERY transaction made deposits, withdraws and re-grow! Common issue when re-growing is no gas fees!

Do Vegetable amount decrease when you harvest?

No, the 'Vegetable' amount will not change. If you make a new deposit or re-grow the amount will increase but not when you harvest (take rewards). The 'Vegetable' are less efficient over time if you harvest too much.

Is this sustainable?

Yes, as long as there is TVL in the contract then there will always be rewards.

The farmer who harvest too much get punished and get lower and lower rewards. It will last a long time and the TVL is higher.

What is the best strategy?

We recommend the tried and tested method as in it is written in the contract.

Re-grow 6 days and harvest 1 day a week. It will compound your investment and receive your initial back in 3-5 weeks.

What prevents the devs from rug pull?

The contract is immutable and fully audited by Haze Security. Therefore cannot be changed or altered in any way shape or form. It is audited and verified. You can view this on bscscan.com and the audit it is found on the website.

The 6/1 Strategy explained?

It is 6 days not 6 re-grow. In those 6 days you can re-grow as many times as you want. It is just compounding faster.

Is it too late to invest?

No, the contract is written to provide an optimal entry for any and all users, new or old. This is the reason the Vegetable per BNB amount changes frequently with TVL fluctuation to provide an even playing field for a new user coming to farm and not giving the first user a headstart.

Can contract functions be added?

No, the contract is immutable and cannot be changed. The contract works perfectly well as it is. No wallets can be blacklisted, no forcing people to re-roast 6 days and eat 1 day a week. Nothing can be changed.

Does it have an anti whale mechanism?

The contract has an in-built anti-whale mechanism. This works as follows; User 1 re-roast 6:1 gets highest daily percentage in that 24 hour period. User 2 does 5:2 gets a lower percentage. User 3 does 4:3 gets lower percentage again. This happens all the way until the user who eats continually rewards will drop to 0.5% per 24 hour period. This is to prevent 1 user draining the TVL, creating sustainability.

What is the minimum deposit?

0.01 bnb minimum deposit requirements. If there are rewards in the "My Rewards" section and you make a new deposit both the new deposit and rewards are transferred into BNB Farm.

What is minimum re-roast?

There is no minimum re-roast requirements. You will always be charged standard BSC BEP20 gas fees for every interaction with the contract.

RoadMap

We will airdrop our Metaverse PASS to the top 2000 address participating in the project when the TVL reaches 2000 BNB. Holding PASS can get all the fees of BNB Farm.

We will launch PASS STAKING when the TVL reaches 5000 BNB. Each PASS is equivalent to a mining machine, which produces \$BNBF tokens every day.

Our metaverse game will be online when the TVL reaches 10000 BNB. \$BNBF will be used in the game, and players will get profit.

DISCLAIMER

We DO NOT guarantee 10% a day it is up to 10%. BNB Farm is illegal in certain countries please consider this when investing. Do not invest more than you can afford to lose.
